

Digital coating thickness gauges SAUTER TF · TG

SAUTER TF

Premium measuring devices for paint coating, lacquer coating etc.

Features

- III LCD display, backlit, display of all information at a glance
- Offset-Accur: This function allows you to adjust the instrument precisely on the locally measured range by a two-point calibration. This results in a superior accuracy of approx. 1 % of the measured value
- Scan mode for continuous measurement or single point measuring mode
- Mini Statistics Kit: displays the measured result, the average value and the max and the min value
- Internal memory up to 99 values
- Selectable measuring units: µm, mil
- · Base plate and calibration foils included
- Data interface RS-232 standard
- Delivered in a robust carrying case, figure shows SAUTER TF

SAUTER TG:

• External sensor for difficult-to-access measuring points

Technical data

- · Precision:
- Standard: 3 % of measured value or ± 2,5 µm
- Offset-Accur: 1 % of measured value or \pm 1 μm
- · Minimal base thickness: 0,3 mm
- Dimensions W×D×H 65×35×126 mm
- · Battery operation, batteries standard 2× 1.5 V AAA
- Net weight approx. 81 g

Accessories

SAUTER TG

- · Data transfer software, interface cable included, SAUTER ATC-01
- · Calibration foils for increased measuring accuracy (covers the range from 20 up to 2000 μ m, with < 3 % tolerance), **SAUTER ATB-US07**
- SAUTER TG: External sensor, TypeFN, SAUTER ATG 01

Model	Measuring range	Readout	Test object	Smallest sample surface	Option Factory calibration certificates	
	[Max]	[d]		(radius)		
SAUTER	μm	μm		mm	KERN	
TF 1250-0.1FN.	100 1250	0,1 1	Combination instrument: F/N	F: Convex: 1,5 Concave: 25	961-112	
TG 1250-0.1FN.	100 1250	0,1 1	Combination instrument: F/N	N: Convex: 3	961-112	

Pictograms

Adjusting program (CAL):

For quick setting of the instrument's accuracy. External adjusting weight required.

Control outputs (optocoupler, digital I/O):

to connect relays, signal lamps, valves, etc.

to connect a suitable peripheral device for

analogue processing of the measurements

ACCU

Battery operation:

Ready for battery operation. The battery type is specified for each device.

Rechargeable battery pack:

Peak hold function:

capturing a peak value within a measuring process.

Analogue interface:

using the saved values, the device calculates statistical data, such as average value, standard deviation etc.

Mains adapter:

rechargeable set.

230V/50Hz in standard version for EU. On request GB, AUS or USA version available.

PC Software:

to transfer the measurement data from the

Power supply:

Integrated, 230V/50Hz in EU. More standards e.g. GB, AUS or USA on request.

device to a PC.

Motorised drive:

The mechanical movement is carried out by a electric motor.

Motorised drive:

The mechanical movement is carried out by a synchronous motor (stepper).

Fast-Move: the total length of travel can be covered by a single lever movement.

DAkkS calibration possible: The time required for DAkkS calibration

is shown in days in the pictogram.

Factory calibration:

The time required for factory calibration is specified in the pictogram.

Package shipment:

The time required for internal shipping preparations is shown in days in the pictogram.

Pallet shipment:

The time required for internal shipping preparations is shown in days in the pictogram.

continuous capture and display of measurements

Push and Pull:

bidirectional, for connection of printer

device within a defined measuring range.

object or the movement during a test process.

Printer: a printer can be connected to the device

to print out the measurement data.

of measurement data with date, time and

serial number. Only with SAUTER printers

GLP/ISO record keeping:

PROTOCOL

Measuring units:

Weighing units can be switched to e.g. non-metric at the touch of a key. Please refer to website for more details.

Measuring with tolerance range (limit-setting function):

Upper and lower limiting can be programmed individually. The process is supported by an audible or visual signal, see the relevant model

MEMORY

RS 232

Data interface USB:

Data interface RS-232:

To connect the measuring instrument to a printer, PC or other peripheral devices.

to a printer, PC or other peripheral devices.

ZERO:

Resets the display to "0".
