The Pulsar vB takes quick and reliable measurements of all of the essential parameters for Hand Arm Vibration assessment. The Pulsar vB has been specifically designed to make the job as simple as possible. Its small size, combined with a powerful processor and large memory enables Safety Professionals to take Hand Arm Vibration to the next level.

Features

Easy to use: Switch-on, press record and that's it!

The Pulsar vB has a large colour screen and with the support of the integrated Pulsar vB Plus LITE software it requires virtually no set-up. View just about everything on the screen without scrolling for a clear presentation of results and easy monitoring of data.

Great connectivity

You can save all measured values to the Pulsar vB's large internal flash memory for subsequent output. You can view the results on the instrument's own display or download to a PC using the Pulsar vB Plus LITE software via a high speed USB connection. The Pulsar vB Plus LITE software is included as standard with each instrument!

Small but mighty!

The built in memory is large enough to never have to worry about storing your measured results safely using the flash technology. You can recall previously recorded data onto the screen or download it for further analysis on a laptop or PC using Pulsar vB Plus LITE or Pro software.
